

Advanced Manufacturing UK – MTEC – 25/26th March 2009 – NEC Birmingham –

Once again Calibration Dynamics Ltd showcased a vast range of Calibration, Test & Measurement Instrumentation at MTEC 2009, giving the chance for visitors to see our instruments in action and chat to our regional engineers.

The CPB5000 Dead Weight Tester again proved extremely popular with visitors and sets a good example of 21st Century engineering at its finest. With an unrivalled accuracy and spin time, teamed with its sleek and clinical design, it is no wonder that this instrument has changed the way in which primary standards are met.

Other products on show included our comprehensive range of pressure controllers, featuring the New CPC3000 High Speed Pressure Controller which really does live up to its name; A control speed of under 3 seconds, 0.025%FS accuracy and user friendly touch-screen interface are just a few of the many credentials which makes this innovative product so unique.
