Important Announcement, please read!

WIKA, a global company and leader in the calibration instruments market segment, have successfully added the DH-Budenberg Group to their portfolio. This acquisition has recently received a significant amount of press coverage.

Calibration Dynamics, WIKA's strategic sales partner spanning several years, will be managing the sales of DH-Budenberg's extensive range of innovative products and calibration services in the UK as from 1st September, 2011.

This will enable Calibration Dynamics to provide the most comprehensive range of pressure calibration standards, from reference grade pressure balances at the metrological level, through industrial dead weight testers, the broadest, most reliable range of pressure calibrators and controllers to process calibrators and transfer standards.

Do please rest assured that your product or service order will still be efficiently processed by the same experts at the DH Budenberg manufacturing facilities so there will be no loss of attention to the high levels of service and quality that you have come to expect from a world leader.

However, commercial routing and sales management will now be handled through Calibration Dynamics who will be absorbing a number of the DH-Budenberg key staff, who we are sure will be known to you and we'll make formal introductions as we move forwards.

We have an increased team of highly experienced and knowledgeable Sales Professionals that will be happy to assist with your order and product queries. Why not call them now on +44 (0) 1264 339030 to discuss your requirements.

Any contact information that you presently have will remain for some time, mobile numbers, where possible, will stay and existing email addresses will be diverted for some while to ensure that we continue to receive your valued contact.

You will also be able to access our website: www.calibrationdynamics.com at any time of the day, which features relevant up-to-date products, information and downloadable PDF product specifications for your reference.

We would like to make ordering our products as easy as possible, so have created this tailor-made and informative presentation pack specifically for your needs. Within the pack, you will find detailed information on products, new account application forms and information for your procurement and finance departments.

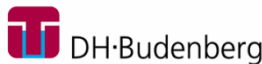

In the meantime, we would like to thank you for your continued custom and if you wish to contact us, please do not hesitate to call +44 (0) 1264 339030 or email: sales@calibrationdynamics.com where your enquiry will be promptly dealt with.

We're keen that this transition goes as smoothly as possible and my personal attention will be on every part of this integration, so if I can assist, or offer any support during this period, then please don't hesitate to contact me at paul.crowhurst@calibrationdynamics.com

My personal thanks in advance, for your patience, while we make this important series of changes, that ultimately will enable us to provide you with an unsurpassed supply capability for both calibration products and services.

Yours Sincerely

Paul Crowhurst
